ABOUT US

We, MORSA-CYBERG Orthopedic Products, are a manufacturer company of such orthopedic products like knee supports, elbow, hand and wrist supports, corsets, insoles, post op orthoses, neck collars, shoulder supports, slimming shorts etc. We produce our products in terms of CE and ISO 9001:2008, ISO 13485:2003 standards.

Our company is located in the Ikitelli industrial center of Istanbul and industrial center of UŞAK city, Turkey. As a result of almost 11 years' acquisitions and experience, we have put the brand MORSA-CYBERG into Turkish and global medical world. We export our products to more than 40 different countries.

The head office is in Istanbul whereas we also have factories in Istanbul and Uşak city.

As we produce our products under our brand **morsa cyberg**, we also do contract manufacturing under our customers' desired brands.

Please note that our company is a registered one in the Undersecretariat of Foreign Trade.

Quality Management

Some of The Raw Materials, We Use in Our Products;

1-NEOPRENE FABRICS;Neoprene is a synthetic rubber product of the family. Is obtained by polymerization of a variety of rubber. Neoprene is used as is common in Underwater diving clothes. MORSA-CYBERG knee supports and some products neoprene mesh fabrics are preferred in the air. (To be air-entrained prevent excessive sweating.) We use in our products neoprene fabric plush on the inside of the Anti-allergic coating provides optimum comfort, the outer surface of the jersey fabric provide maximum durability and flexibility

2-CORSET FABRICS; 100% COTTON Corsets --- Weaving --- Morsa-CYBERG elastic woven FABRICS manufactured using 100% cotton yarn. There is less risk of allergic reactions in sensitive skin, especially of cotton yarns. The body perspiration and moisture from the air-conditioning feature of the fabrics, as well as with the modern design provides maximum comfort and ease of use.

3-KNITTING FABRICS;Made of highly elastic, air permeable and compressive knitted fabric.MORSA-CYBERG Knitted products, keep within the technical textile machinery manufactured in high-tech equipment.

Quality Standards;

All Products, EU Medical Device Directive 93/43/EEC Annex I is according to the basic requirements.

Quality Certificates;

ISO-9001:2008- ISO-13485:2003- CE DECLARATION OF CONFORMITY

Neck Collars

CAUSES OF NECK PAIN

Bad positions and bad use of the neck, whiplash, neck stiff, cervical disk, muscle spasm, disk degeneration, degeneration, calcification, tension, bad life conditions, narrowing of the spinal canal, rheumatic diseases, osteoporosis (osteoclasia), vertebral fractures, shift of the spine, entrapment of nerves in the hand arm (jam).

USES COLLAR

- The collar are recommended in the period of acute painful in its first 2 week for relief and restrict the movement.
- Who had accident they have to wear collar until the studies are compilited.
- Its not recommend to wear the collar for more than three weeks because it can case melting and muscle weakness.
- Its important to make neck axarises in the late periods.
- Who had operation in the neck may need to use the collar for along time.

Neck Cy C1

Cervical Orthosis With Chin Support

Product Properties:

Constrains movements of the neck following neck traumas and cervical disc hernia.

Details:

Made of PVC material in 1,5 mm thickness.

Neck height is adjustable.

REF-11.101

REF-12.102

Neck Cy C2

Cervical Orthosis Foam

Product Properties:

Relieves the pain in the neck by constraining the movements of the neck in cases of mild pains in the neck. Functions well in cases of cervical muscle pains, cervical osteoarthritis and cervical disc hernia.

Details:

Made of plastazote (compressed foam) material in 12 mm thickness. Cotton cover enables optimum comfort.

Color: White, Dark blue

Neck Cy C3

Cervical Orthosis Spong

Product Properties:

Inhibits the movements to relieve moderate pain of the neck. Applicable in cases of cervical disc hernia, cervical osteoarthritis and cervical muscle pains.

Details:

Made of 45 density sponge in 2,5 cm thickness. Holstered with cotton fabric.

Color: White, Dark blue

Height: 7,5 cm, 8,5 cm, 10 cm.

REF-12.103

REF-12.104

Neck Cy C4

Cervical Orthosis Philadelphia (Closed)

Product Properties:

Provides higher stabilization following a neck trauma or cervical disc hernia.

Details:

Made of plastazote (compressed foam) material in 12 mm thickness.

Suitable for MR monitoring.

REF-TI-105

Neck Cy C5

Minerva Orthosis CTO

Product Properties:

It functions well with severe neck traumas and for body support and stabilization of cervical area following a surgery and heavy neck traumas.

Details:

The frame is made of polyethylene material. In the inside, there is a removable sponge pad laminated with terry cloth. Hook and Loop bandages enable easy adjustment.

REF-11.106

Neck Cy C6

Cervical Orthosis First Aid

Product Properties:

Designed for use in first aid.

Details:

1,5 mm thick made of PVC material, the inner surface of the foam material neck is stain-resistant.

Neck Cy C7

Cervical Orthosis Traction

Product Properties:

Provides excellent stabilisation following neck traumas and cervical disc hernia.

Details:

Thanks to its special design, it offers optimum comfort. It is made of polyethylene material covered with sponge fabric laminated sponge.

REF-11.107

REF-12.108

Neck Cy C4 A

Cervical Orthosis Philadelphia (Open)

Product Properties:

Provides higher stabilization following a neck trauma or cervical disc hernia.

Details:

Made of plastozote (compressed foam) material in 12 mm thickness.

Suitable for MR monitoring.

Upper Extremite

COUSES OF SHOULDER PAIN:

Impingement syndrome, bursitis, frozen shoulder, arthritis, sustained injuries, rometoid artrid, ankilozen spondilit, polimiyalje rometike.

uses shoulder:

USES SHOULDER:

- Protecting and balancing the body temperature.
- The absorption of body sweat before the cool,
- Provides stabilization and compression of joints
- Time is reduced muscle, nerve and bone regeneration
- Reduces the pain as soon as possible.

Soft Cy Arm Sling Lux

Product Properties:

Stabilizes the arm in the desired position to immobilize the arm-shoulder.

Details:

Made of sponge laminated with terry cloth in the inside and flocculent fabric in the outside.

Comes with an adjustable neck-shoulder strap and a waist belt.

Soft Cy 30°

Arm Sling With Cushion (30 deg)

Product Properties:

Provides immobilization of the arm at 30 degrees of abduction.
Used in post-op immobilization of the shoulder following rotator cuff and habitual dislocations and subluxations.

Details:

Made of laminated fabric and sponge cushion.
The design of the cushion allows easy use of either arm.

REF-30.305

REF-30.306

Soft Cy 60°

Arm Sling With Cushion (45-60 deg)

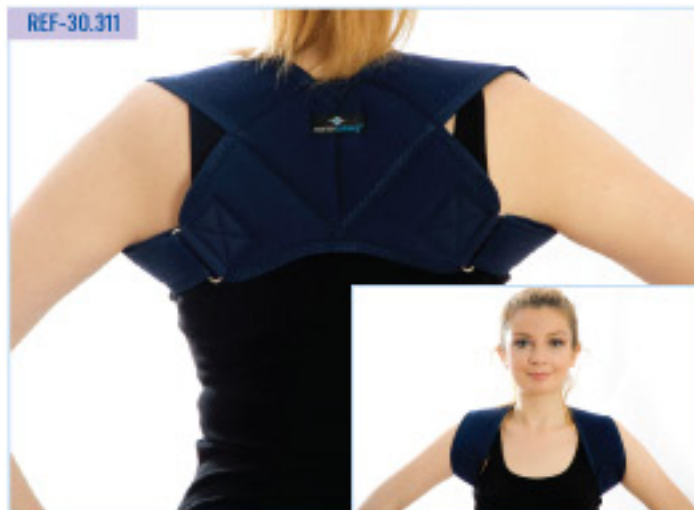

Product Properties:

Provides immobilization of the arm at 30 degrees of abduction.
Used in post-op immobilization of the shoulder following rotator cuff and habitual dislocations and subluxations.

Details:

Made of laminated fabric and sponge cushion.
The design of the cushion allows easy use of either arm.

REF-30.311

Soft Cy Scap

Clavicle Bandage

Product Properties:

It can replace a plaster to stabilize the clavicle bone in cases of clavicle fractures.

Details:

The pad at the back is made of laminated sponge in 8 mm thickness.

Enables anatomic stabilization of the clavicle bone thanks to its elasticity reduced straps.

REF-30.800

Thermo Cy Omo

Shoulder Support Neoprene

Product Properties:

Provides Protection and warmth for shoulder joints.
Provides support for the shoulders when exposed to severe stress, in sport activities and chronic pain cases.

Details:

Made of perforated neoprene fabric in 3 mm thickness.

Wool Cy Omo

Shoulder Support Wool

Product Properties:

Provides warmth to the shoulder joint.
Provides light support in sport activities and in chronic pain conditions.

Details:

Made of acrylic fabric.

REF-30.801

Elbow Supporters.

COUSES OF ELBOW PAIN:

Cause of most great discomfort in elbow enthesitis and lateral epicondilit.

Olekrenon bursit common disorder in the elbow, does the the pain and swelling in the elbow.

USES ELBOW:

- Sports injuries
- Sports traumas
- Muscle cramps
- Traumatic muscle tears
- Chronic pains
- Help improvement the after surgery

Thermo Cy Epi1 Elbow Support

Product Properties:

Provides warmth and support for the elbow joint.

Used in the treatment of tennis elbow syndrome and Epichondylitis.

Details:

Made of dual laminated perforated neoprene which allows air through the channels

REF-50.301

REF-50.302

Thermo Cy Epi2 Elbow Support With Pad

Product Properties:

Protects elbow area against impacts.

Details:

Made of dual laminated perforated neoprene which allows air through the channels

REF-50.304

Epi Berg E1 Elbow Support Knitted

Product Properties:

Used in the treatment of the tennis elbow syndrome and epicondylitis.

Details:

Made of highly elastic, air permeable and compressive knitted fabric.

Has medial and lateral silicon pad

Color: Black, Skin

Thermo Cy Epicon Apicondilitis Bandage

Product Properties:

Used in the treatment of epicondylitis by decreasing the load on the tendons by applying compression.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the three-headed silicone pad inside, it applies constant pressure and compression to the epicondyl heads.

REF-50.303

REF-53.015

Thermo Cy Pro Elbow Contracture Orthosis

Product Properties:

Enables Controlled mobilization of elbow joint. Used in the temporary immobilization following medial and lateral epicondyl fractures, elbow luxation/dislocation, elbow arthrolysis.

Details:

The desired degree of bend angle of the sides with adjustable joints, allows for flexion and extension control.

Thermo Cy Multi Elbow Contracture Orthosis (Thermoplastic)

Product Properties:

Enables controlled mobilization of elbow joint. Used in the temporary immobilization following medial and lateral epicondyl fractures, elbow luxation/dislocation, elbow arthrolysis.

Details:

Provides an optional 10-degree elbow angles immobilizes-direction.

To wear, adjust and easy to clean.

There are skin-friendly pads are removable and washable.

Covered with a soft pad and an adjustable hand support.

REF-53.016

Hand - Wrist - Finger

CAUSES OF HAND AND WRIST PAIN

Osteoarthritis, de Quervain disease, carpal tunnel syndrome, compression of the ulnar nerve in the wrist, trigger finger, Dupuytren's contracture, Sudeck's atrophy, Raynaud's disease, arthritis, (rheumatoid arthritis, psoriatic arthritis, ankylosing spondylitis), osteoarthropathy, ganglion cyst, trauma.

USES OF HAND AND WRIST SUPPORT

- In treatment of carpal tunnel syndrome and after operations.
- After mild and secondary twists immobilization.
- straining of the wrist.
- After the Fractures of the lower end of plaster.
- wrist inflammation, cysts.
- stability wrist disorders.
- The chronic wrist post- operative or post – traumatic soft tissue of injuries.
- Tendinitis.
- rheumatoid arthritis.

REF-60.015

Manu Cy H15 Thumb Splint

Product Properties:

Inhibits the thumb joint and provides external support.

Used in De quervain syndrome and thumb ligament problems.

Details:

Made of specially designed elastic cotton fabric.

Thanks to the aluminum rod inside, position of the thumb is adjustable.

Manu Cy H16 Wrist Splint (Short)

Product Properties:

Provides immobilization and constrains to the wrist in pain.

Details:

Made of specially designed elastic cotton fabric.

The aluminum rod inside constrains the movements of the wrist.

It is 16 cm long.

Manu Cy H19 Wrist Splint (Long)

Product Properties:

Provides immobilization and constrains to the movements of the wrist.

Details:

Made of specially designed elastic cotton fabric.

The aluminum rod inside constrains the movements of the wrist.

Provides better stabilization thanks to the elastic bandage it is 19 cm long.

REF-60.019

Manu Cy H21 Wrist Splint With Thumb Supported

Product Properties:

Stabilizes the carpometacarpal and metacarpophalangeal joints of the thumb.

Enables immobilization of the wrist in conditions such as carpal tunnel syndrome and painful wrist.

Details:

Made of specially designed elastic cotton fabric.

The aluminum rod inside constrains the movements of the wrist.

Ortho Cy H33 Static Wrist Splint

Product Properties:
Enables immobilization of wrist. Prevents ulnar and radial rotations. Used in resting position following plaster treatment of fractures and painful positions of the wrist.

Details:
Made of polyethylene sheets in 3 mm thickness. Provide optimum comfort and cleanliness thanks to the removable holster.

REF-61.033

REF-61.034

Ortho Cy H34 Static Hand Splint

Product Properties:
Provides a resting position for wrist by keeping wrist at 30 degrees' dorsiflexion and IP joints at mild flexion.

Used to prevent rheumatoid arthritis and contracture.

Details:
Made of polyethylene sheets in 3 mm thickness. Provide optimum comfort and cleanliness thanks to the removable holster.

REF-61.035

Ortho Cy H35 Static-Fingered Hand Wrist Splint

Product Properties:
Provides a resting position for wrist by keeping wrist at 30 degrees' dorsiflexion and IP joints at mild flexion. Used to prevent rheumatoid arthritis and contracture.

Details:
Made of polyethylene sheets in 3 mm thickness. Provide optimum comfort and cleanliness thanks to the removable holster.

Ortho Cy H40 Dynamic Hand Splint

Product Properties:
Commonly used to exercise the fingers in cases of stiffness or inactivity following Cerebral Palsy, Distal Radius/Ulna, Multiple Sclerosis, Muscular Dystrophy, Stroke and tendon/ligament operations.

Details:
Easy to adjust. Biomechanically correct. Applicable with children and adults.

Lumbo Cy CPT1 Corset Posturex

Product Properties:

Provides a simulative and corrective effect in postural deficiencies and mild kyphosis.

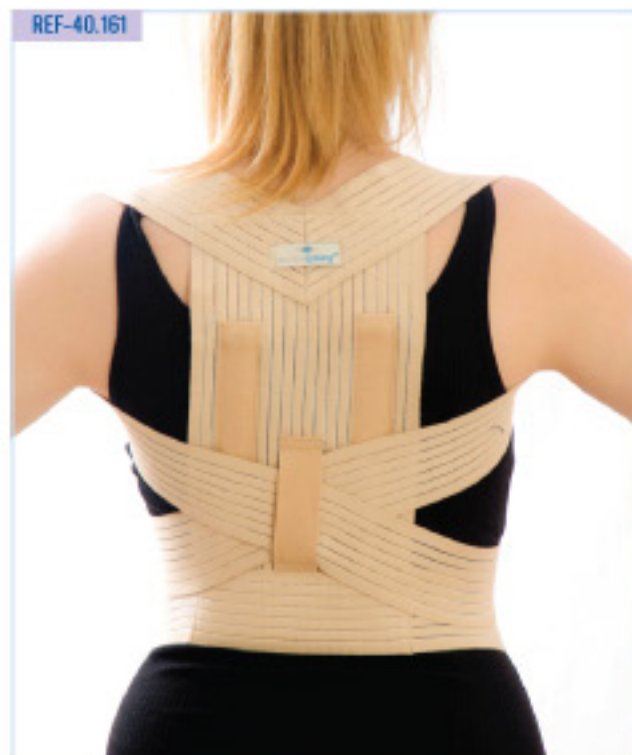

Details:

Made of gutted elastic fabric that is woven with 100 % cotton yarn.

Elastic shoulder bandages enable upright position and help patients gain upright sitting habits.

REF-40.161

REF-40.162

Lumbo Cy CPT2 Corset Posturex for Pregnant

Product Properties:

In the period before birth is used. Postural disorders and mild degrees of kyphosis also have a corrective effect. At the same time providing support for the waist and back muscles, and the abdomen is used to prevent sagging.

Details:

Made of gutted elastic fabric that is woven with 100 % cotton yarn.

Thanks to the weaving system of the fabric with air channels, perspiration is minimized.

Lumbo Cy CAS3 Corset Lumbo-Sacral For Pregnant

Product Properties:

In the period before birth is used supports back muscles in problems of lower back/lumbago/in association with facet joint disorders. At the same time also is used to prevent sagging in the abdominal.

Details:

Made of gutted elastic fabric that is woven with 100 % cotton yarn.

Thanks to the weaving system of the fabric with air channels, perspiration is minimized.

REF-40.439

REF-40.202

Thermo Cy L2

Corset Lumbo-Sacral Neoprene (With Belt)

Product Properties:

Provides warmth and support to lumbar area to relieve lumbar and rheumatismal pain.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

The neoprene has been laminated with elastic jersey fabric both interiorly and exteriorly (for optimum compression and durability).

Product Properties:

Supports back muscles in problems of lower back(lumbago)in association with facetjoint disorders.

Removes the pain in the sacroiliac and lumbo-sacral joint in cases of chronic lumbo-sacral pains.

Details:

Back height is 32 cm.

Made of gutted elastic fabric that is woven with 100 % cotton yarn.

Thanks to the weaving system of the fabric with air channels, perspiration is minimized.

With additional bandages, stronger support to the lumbar muscles is acquired.

REF-40.250

Lumbo Cy CLS1

Corset Light Lumbostad

Product Properties:

Supports back muscles in problems of lower back(lumbago) in association with facetjoint disorders.

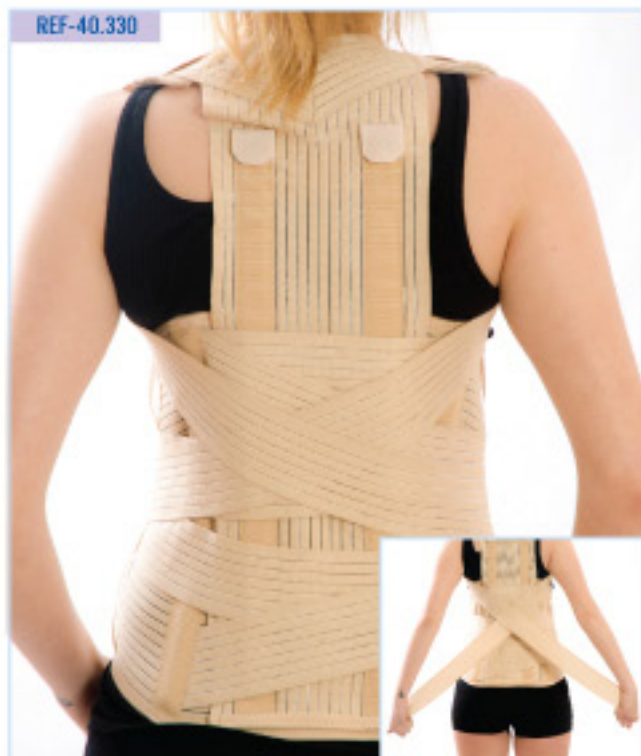

Details:

Back height is 26 cm.

Made of gutted elastic fabric that is woven with 100 % cotton yarn.

Thanks to the weaving system of the fabric with air channels, perspiration is minimized.

REF-40.330

Lumbo Cy CTLS1 Corset Thoraco-Lomber

Product Properties:

Helps to correct dorsal spine and helps in the treatment of kyphosis.

Provides stabilization for hyperextension in vertebral fractures of lumbar and thoracic spine.

Details:

Made of gutted elastic fabric that is woven with 100 % cotton yarn.

Removable steel stays at the back enable easier adjustment according to the form of the vertebrae.

Additional straps provide stronger support to the waist and back muscles.

Lumbo Cy CAS1 Corset Abdominal

Product Properties:

Supports abdominal area following abdominal surgeries.
Prevents sagging in the abdominal area following pregnancy.

Details:

Made of 100 % gutted elastic fabric that is woven with 100 % cotton yarn.
Thanks to the weaving system of the fabric with air channels, perspiration is minimized.

REF-40.421

Lumbo Cy CAS2 Corset Sternum

Product Properties:

Supports sternum after an open heart or thoracic surgery.
Enables stabilization in case of fractures in the sternum.

Details:

Made of 100 % gutted elastic fabric that is woven with 100 % cotton yarn.
On the chest point inside the corset, there is a soft pad laminated with terry cloth.

REF-41.001

Wool Cy YK Corset Wool

Product Properties:

Provides warmth to the abdominal and lumbar area by maintaining body temperature.

Details:

Made of acrylic fabric.

REF-41.002

Wool Cy YK-A Corset Wool (Open)

Product Properties:

Provides warmth to the abdominal and lumbar area by maintaining body temperature.

Details:

Made of acrylic fabric.

REF-44.550

HyPo Cy Jewet Corset Hyperextension (Jewet)

Product Properties:

Stabilizes the hyperextension of vertebral column on the sagittal plan in compression fractures of the vertebra.
Inhibits lateral flexion with aluminum frame.

Details:

Consists of a front part that is an aluminum frame and a back part that is a plastic support laminated with sponge and fabric.

REF-70.101

Herni Cy Inguinal Rupture Belt

Product Properties:

Provides gentle pressure on inguinal hernia.

Details:

The waist belt that is made of elastic material in 5 cm height can be adjusted to desired waist width.

FB-101 RIGHT (Has an anatomic polyurethane compress specifically designed to fit to the right side of the inguen)

FB-101 LEFT (Has an anatomic polyurethane compress specifically designed to fit to the left side of the inguen)

FB-102 DOUBLE (Has two anatomic polyurethane compresses specifically designed to fit to both sides of the inguen)

Thermo Cy Thigh Thigh Support

Product Properties:

It is effective in cases where protection to the Femur is required.

It also supports the quadriceps and adductor muscle groups in lesions by applying heat and compression.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

REF-70.500

REF-70.501

Thermo Cy Calf Calf Support

Product Properties:

When protection for tibial bone is required. Provides warmth and compression in case of muscular lesions.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

REF-70.503

Thermo Cy Hip Hip Support

Product Properties:

Provides warmth, protection and support for the soft tissues around the hip joint.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

Supports the hip joint with a plastic or metal hinge placed in a pocket located on the hip joint.

REF-70.700

Thermo Cy Tayt Sport Tayt

Product Properties:

Prevent sports injuries.

Help to lose weight from waist, hip and abdominal areas.

Helps to get rid off cellulites and toxins.

Tighten up and smoothen the skin, accelerate blood circulation and invigorate the skin.

Details:

Made of dual laminated latex-free neoprene

The neoprene has been laminated with elastic jersey fabric both interiorly and exteriorly (for optimum compression and durability) Come in blue or black colours.

REF-71.021

Cyberg Hip

Hip Orthosis With Functional Joint

Product Properties:

Post-operative stabilization after total hip replacement and revision.

Details:

Prevents recurrent luxation.

Abduction and Adduction angles can be adjusted.

Flexion and extension angles can be adjusted in 20 degrees' increments (up to 120 degrees)

Protects active transmission in the pelvic and inguinal area.

SUB EXTERMITE

COUSES OF KNEE PAIN:

Inflammatory, degenerative, traumatic, avascular / necrotic, neoplastic, congenital hip disease, lumbago from causes.

USES KNEE BRACE:

- For trauma, inflammation and arthritis,
- protection and rehabilitation,
- collateral ligament injuries,
- slight tissue lesions,
- disorders of joint and ligament
- osteoarthritis and arthritis

Thermo Cy Genu

Knee Support Closed Patella

Product Properties:

For protection purposes. Applies constant compression and provides heat.
Functions well with light traumas and inflammation.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

REF-20.100

REF-20.101

Thermo Cy Genu1

Knee Support Open Patella

Product Properties:

Functions well with patellar femoral pains, osteoarthritis and meniscus injuries.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

Optimum support to the patella is provided thanks to the special pad around the patella.

Thermo Cy Genu2

Knee Support With Flexible Stays (Short)

Product Properties:

Supports collateral ligament with the flexible stays on the sides.

Besides the support to the patella, the product functions well with ligament injuries.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

The steel springs on the sides provide perfect support to the lateral ligaments.

REF-20.102

REF-20.103

Thermo Cy Genu3

Knee Support With Flexible Stays (Long)

Product Properties:

Flexible stays enriched with velcros provides effective collateral stabilization. Provide full protection during contact sports.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

The steel springs on the sides provide perfect support to the lateral ligaments.

With the upper and lower hook and loop straps, it is aimed to prevent slipping down.

REF-20.104

Thermo Cy Genu3A

Knee Support With Flexible Stays (Long-Open)

Product Properties:

Flexible Stays enriched with velcros provides effective collateral stabilization. It functions well with strain - sprain, arthritis and tendinitis.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

The steel springs on the sides provide perfect support to the lateral ligaments.

With the upper and lower hook and loop straps, it is aimed to prevent slipping down.

Half open front allows easy put on and take off

Knee Support With Hinged Stabilizing

Product Properties:

In cases of collateral traumas to the knee, provides strong support to the knee.

This product functions well with ligament injuries, soft tissue lesions, and other knee joint traumas.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

Thanks to the rigid hinges on both sides, maximum support to the knee is acquired where as there is no limitation to the movements of the knee.

Upper and lower hook and loop bandages prevent slipping down.

Thermo Cy Genu 6 Knee Support With Pad

Product Properties:

Provides protection for patella and the knee against impact especially during sports activities.

The product functions well with patella and soft tissue lesions around the patella.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

The soft pad covering the patella absorbs shocks to the knee.

REF-20.108

REF-20.109

Thermo Cy Genu 9 Knee Support With Crossed Ligament

Product Properties:

Provides Support for anterior cruciate ligament thanks to its cross straps.

This product functions well with chronic instabilisation of the cruciate ligaments and patella subluxation.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the air channels in the neoprene, it is aimed to reduce excessive perspiration without losing body temperature.

Provides support to the lateral ligaments by its steel springs on the sides.

It reduces excessive stress to the cruciate ligaments thanks to its velcro bandages in the front (which can be adjusted laterally or medially with the buckles provided on the product).

Thermo Cy Genu 10 Knee Tendon Band

Product Properties:

Supports knee joint by applying pressure on the quadriceps tendon.

It functions well with patellar tendinitis.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the silicone pad inside, the level of pressure and location of the stress to the quadriceps tendon is adjustable.

REF-20.110

REF-20.111

Thermo Cy Genu 11 Knee Tendon Support

Product Properties:

Used in treatment of Osgood-Schlatter's disease and patellar tendinitis.

Details:

Made of dual laminated perforated neoprene which allows air through the channels.

Thanks to the silicone pad inside, the level of pressure and location of the stress to the quadriceps tendon is adjustable.

Genu Berg M1

Knee Support Knitted

Product Properties:

This product functions well with patellar femoral pains, osteoarthritis and meniscus lesions.

Details:

Made of highly elastic, air permeable and compressive knitted fabric. Thanks to the silicone pad around the patella, provides support to the stabilisation of the patella.
